Introduction

The web was simple in its initial days. All you need is Mosaic to browse it and a text editor for creating pages in HTML, and it was the tech team taking care of such stuff. Things changed with time and realizing that even non-techies have a lot to contribute, in terms of content, the CMS or Content Management System was born.

This CMS will help administrators to create and publish content in an easy and standard format even if they don't know HTML or other languages. Administrators can also co-ordinate and control the work of the teams of editors and authors as well as control and manage the quality and branding of content using this CMS.

Admin Home Panel

This is the admin home panel, where you will be taken after you log in using your User ID and password. Administrators can directly access the option from here. By clicking on a particular option the selected functionality will open.

1. Dashboard

The dashboard is the page where you can see what is happening in your admin interface. Admin can directly access the option from here. Clicking on particular option the selected functionality will open.

2. Home

Clicking this button will take the user to the home page of the management system.

3. Manual

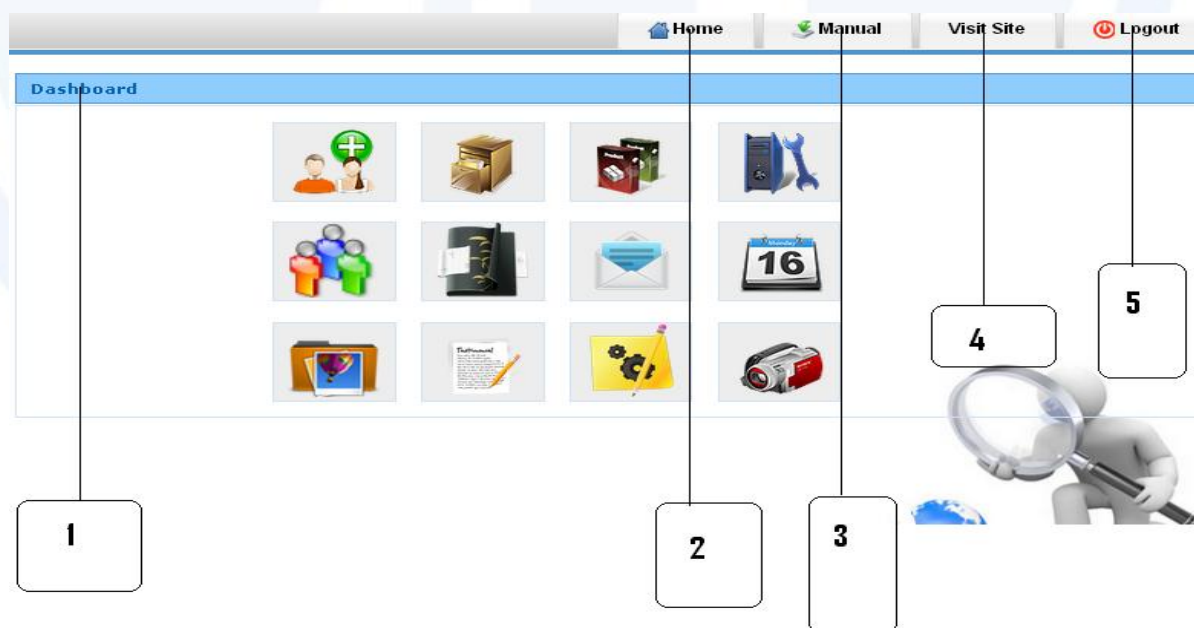

Administrators/ users click here to download a copy of the User Manual.

4. Visit Site

Click this button to visit your website. It will help the administrators to preview edits and changes they are making in the website's content in real time.

5. Logout

To logout from the content management system, click this button.

1. USER MANAGEMENT

User management, an authentication feature, is critical in maintaining a system secure. It helps administrators to identify and control the users logged into the network. However, it is essential to maintain proper user account management techniques as ineffective or privilege management may compromise the systems.

The screenshot shows a web application interface for user management. On the left is a sidebar menu with options like User Management, CMS Management, Product Management, etc. The main area contains a table with columns: ID, NAME, STATUS, LAST LOGIN, and ACTION. Numbered callouts point to specific elements: 1 points to the ID column, 2 to the NAME column, 3 to the STATUS column, 4 to the LAST LOGIN column, 5 to the 'Add User' button, and 6 to the 'Edit' and 'Delete' icons in the ACTION column.

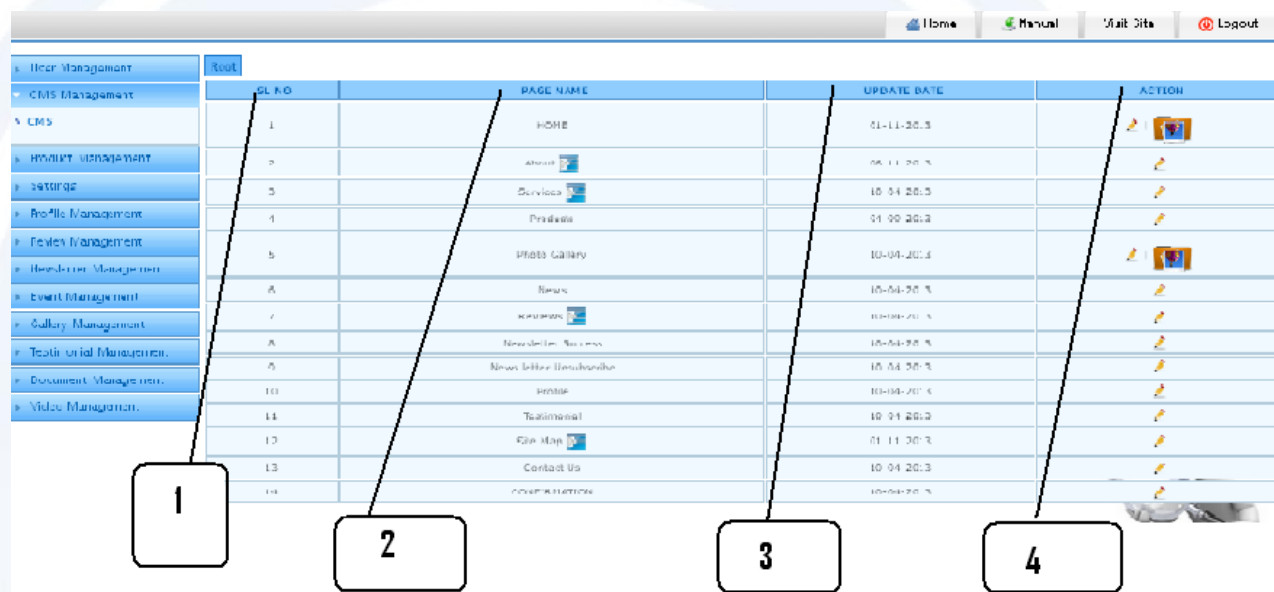

ID	NAME	STATUS	LAST LOGIN	ACTION

sdh gjl	sdh gjl sdh gjl	Active	2013-04-01 21:50:24 11.93.63.217	
sdh gjl	sdh gjl sdh gjl	Active	2013-04-01 21:50:24 11.93.63.217	

- 1. ID:** - Identity management facilitates the management of a user's identity. It helps administrators to identify individuals in a system and control their access to the existing resources in the system by adding/removing restrictions on the users.
- 2. Name:** - This column is used for displaying the user's full name on the user management page.
- 3. Status:** - The status column consist of two options - Active and Deactive. Based on the requirement of a situation, administrators can activate or deactivate a certain user.
- 4. Last Login:** - Administrators can see the last login details of a particular user in the system including the exact date and time. It also records the said user's IP address.
- 5. Add User:** - This button is used to add new users to the system.

6. **Action:** - One of the most significant column in terms of editing the entire user management system. Action primarily includes two options: (a) Edit  and (b) Delete .
- (a) **Edit:** Edit option is used to make any necessary changes in any existing fields of a said user.
- (b) **Delete:** Delete option is used to delete a particular user altogether from the management system. This option can't be found in the SuperAdmin's column as it is not possible to delete the Superadmin.

2. CMS Management

CMS stands for Content Management System and it is a software tool allowing administrators to create, edit, and publish content. CMS Management allows the content manager or administrators to add, manage, modify, and remove content from a Web site even without technical knowledge.

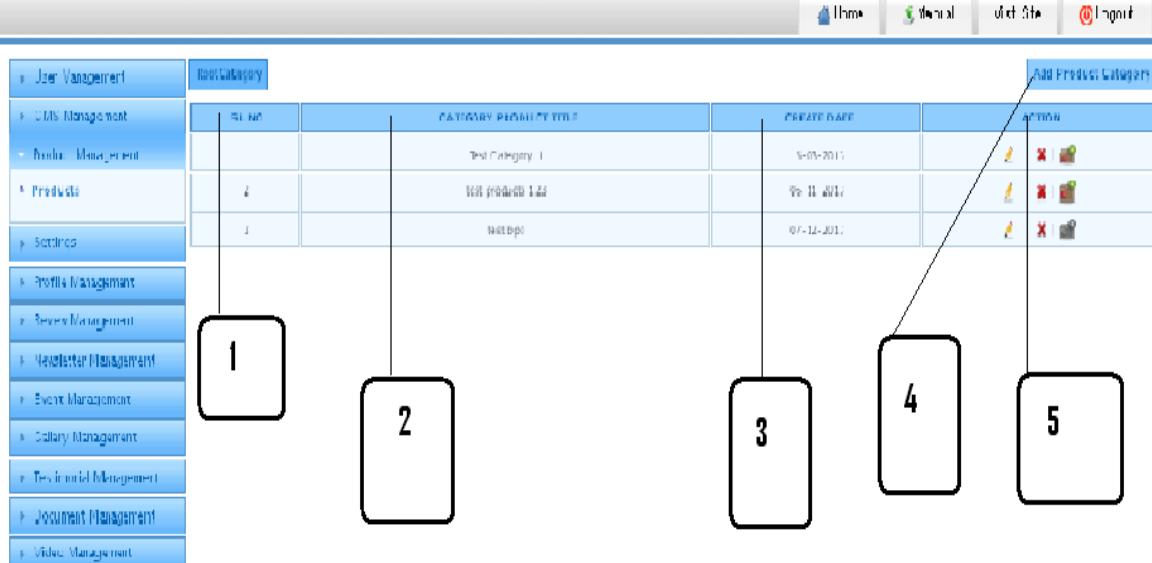

SL No	PAGE NAME	UPDATE DATE	ACTION

- 1. SL No:** - It lists the menu in the management system in a sequential manner.
- 2. Page Name:** - This column lists the different types of pages residing within the management system framework. Many of the page names contain different submenu  with their respective page name, last update date, and editing/ delete options.
- 3. Update date:** - This column gives us the last update date of each and every page within the management system.
- 4. Action:** - It offers editing option, allowing the administrators to edit a particular page.

Administrators can Edit a page , or Add or Remove images .

3. Product Management

Product management deals with the process of collecting and using data about the products that your business handles, makes or sells. It includes planning, forecasting or marketing of products during all stages of the product lifecycle. Product management may encompass a wide range of activities, which is essential to get your product to market and to provide support thereafter.

- Status:** - Administrators can use this option to mark the status of a particular PDF file as Active or Deactive according to requirement of the situation.
- Action:** - The action column consists of three options Download , Edit  and Delete . The Download option is used to download a particular PDF file; Edit option allows editing a PDF including its Title, Category, and Details, and Delete option helps to remove the file altogether from the system.
- Add PDF:** - Click this button to add a PDF file. There are different fields that the administrators need to fill up, these include: Title, Category, Details and Upload the File.

12. Video Management

Video Management ensures a smooth managing of all the video files for senior executives. It keeps them in a structured and secure way.

The screenshot shows a web application interface for video management. On the left is a sidebar menu with options: User Management, CMS Management, Product Management, Settings, Profile Management, Review Management, Newsletter Management, Event Management, Gallery Management, Testimonial Management, Document Management, Video Management, and Videocategory. The main content area has a top navigation bar with Home, Manual, Visit Site, and Logout. Below this is a 'Root Category' section with an 'Add Video Category' button. A table lists video files with columns: SL NO, VIDEO TITLE, CREATE DATE, STATUS, and ACTION. The table contains five rows of data. Numbered callouts point to specific elements: 1 points to the SL NO column, 2 to the VIDEO TITLE column, 3 to the CREATE DATE column, 4 to the STATUS column, 5 to the Add Video Category button, and 6 to the ACTION column.

SL NO	VIDEO TITLE	CREATE DATE	STATUS	ACTION
1	TLV Videos	07-03-2013	active	[Edit] [Delete] [Lock]
2	YouTube	07-03-2013	active	[Edit] [Delete] [Lock]
3	Test video Category	11-03-2013	active	[Edit] [Delete] [Lock]
4	delhi	06-11-2013	active	[Edit] [Delete] [Lock]
5	test doc	07-12-2013	active	[Edit] [Delete] [Lock]

- 1. SL No:** - It lists the video files in a proper sequential manner.
- 2. Video Title:** - This field helps to identify each and every video files by their names.
- 3. Create Date:** - In this column administrators can see the creation date of each and every video files listed in the management system.
- 4. Status:** - This option allows the administrators to Activate or Deactivate a particular video file in the system according to the requirement of the situation.
- 5. Add Video Category:** - Click this button enables to add a new video category to the existing system. The submission form for adding the video category includes Video Category Name and Upload Video Category Images. It is mandatory to fill up both the fields.

6. **Action:** - This is the video management system's editing option. The available options include: Edit , Delete  and Adding Video . When the administrator has to edit or delete a video category he/she can use the options accordingly. The Add Video option is used to upload a video file.
